Hemanth Chowdary Kavula

Data Engineer

+1 (856) 524-6050 | hemanthchowdarykavula10@gmail.com | linkedin.com/in/hemanthchowdarykavula | hemanthkavula.com

PROFESSIONAL SUMMARY

Data Engineer with **1+ years of experience** developing, maintaining, and optimizing **ETL/ELT data pipelines** using **Python, SQL, PySpark, and AWS**. Hands-on experience with **Apache Spark, AWS Glue, Amazon EMR, Amazon S3, Snowflake, and dbt** for batch processing, data transformation, and cloud-based analytics. Skilled in **SQL development, data modeling, data quality validation, and pipeline troubleshooting**, with exposure to real-time ingestion using Kafka and AWS Kinesis. Experienced in preparing reliable financial datasets for reporting, risk analytics, and downstream AI/ML applications.

TECHNICAL SKILLS

Programming Languages: Python, SQL, Scala
Cloud Platforms: AWS (Glue, EMR, S3, Redshift, Lambda, Kinesis)
Big Data & Streaming: Apache Spark, PySpark, Apache Kafka, Delta Lake, Databricks
Databases & Data Warehousing: Snowflake, PostgreSQL, MySQL, SQL Server, Oracle
Data Integration & Orchestration: dbt, Apache Airflow, ETL/ELT Pipelines
Data Modeling & Quality: Dimensional Modeling, Star Schema, SCD Type 2, Great Expectations, Data Validation
DevOps & Analytics: Git, Jenkins, Terraform, Docker, Power BI, Tableau

PROFESSIONAL EXPERIENCE

Fidelity Investments | Jersey City, NJ — Jan 2026 – Present

Data Engineer

- Developed and maintained **ETL/ELT pipelines using Python, SQL, PySpark, AWS Glue, and Amazon EMR**, processing financial and trading datasets for downstream analytics and reporting.
- Built **PySpark data transformations** to clean, filter, join, and aggregate raw data stored in **Amazon S3**, preparing structured datasets for analytical workloads.
- Supported **near-real-time data ingestion using Apache Kafka and AWS Kinesis**, helping deliver trading event data to downstream processing and monitoring systems.
- Developed **Snowflake SQL queries and dbt models** to transform source data into analytics-ready tables supporting financial reporting.
- Implemented automated data quality checks using **Python, SQL, and Great Expectations** to identify duplicate records, missing values, and schema inconsistencies before datasets were loaded into downstream reporting tables.
- Prepared and validated **Delta Lake datasets using PySpark**, supporting financial analytics and downstream AI/ML applications, including risk analysis and anomaly detection.
- Monitored ETL pipeline executions, investigated data processing failures using logs and validation checks, and supported code deployments through **Git and Jenkins**.

Mastercard | San Francisco, CA — May 2025 – Aug 2025

Data Engineer Intern

- Developed **Python and SQL scripts** under engineering team guidance to extract, clean, and transform structured datasets for internal analytics and reporting.
- Assisted with **ETL pipeline development, testing, and data loading**, validating source-to-target transformations in relational databases.
- Developed SQL queries using **joins, subqueries, aggregations, and filtering** to extract, transform, and validate structured datasets for analytics and reporting.
- Performed **data quality checks** to identify missing values, duplicate records, and source-to-target inconsistencies in structured datasets.
- Supported **AWS S3 data processing and ETL troubleshooting**, collaborating with data engineers to investigate data loading issues and document pipeline workflows.

EDUCATION

Master of Science in Computer Science — Jan 2024 – Dec 2025
Rowan University | Glassboro, NJ

CERTIFICATIONS

SQL (Advanced) Skill Certification — HackerRank | May 2025
AWS Academy Cloud Foundations — AWS Academy | Feb 2022
Foundations: Data, Data, Everywhere — Google / Coursera | Nov 2025
